PROFESSIONAL SUMMARY

Frontend Engineer and React Native Developer with 3 years of experience shipping production-grade mobile apps and React / Next.js web platforms. Leads the frontend team at Zoca; architected the mobile and web products that scaled a B2B SaaS platform to **\$3M+ ARR** across 500+ businesses. Specialized in server-driven UI, payments (Stripe, Tap to Pay, Razorpay), native modules (Swift, Kotlin), and React Native New Architecture; ships solo indie apps on the App Store and Google Play.

WORK EXPERIENCE

Founding Frontend Engineer & Frontend Lead

Dec 2023 - Present

Zoca - Bengaluru, India Shipped: [Zoca iOS](#) | [Android](#) | [Web](#) • [Chrone iOS](#)

- **Led the company-wide frontend team** across mobile and web — owning architecture, code reviews, and roadmap; built Zoca's React Native mobile app from scratch as the company's core product, now live on iOS and Android.
- Delivered a web platform with calendar-based appointment booking, client/service management, payment processing, and an AI chatbot — scaling Zoca's B2B SaaS platform *Chrone* to **500+ businesses**.
- Architected a **server-driven UI** system shipping components Over-The-Air (OTA), cutting time-to-market from weeks to hours; drove migration to **React Native New Architecture** (Fabric, TurboModules) for improved render performance.
- Built a custom design system reducing UI development time by **40%**; established a CI/CD pipeline (Expo Dev Client, EAS Build, GitHub Actions, Fastlane) cutting deployment effort by **90%**.
- Implemented **Stripe** and **Tap to Pay on iPhone** contactless payments; **OAuth 2.0** social login (Facebook, Instagram, Pinterest); authored iOS (Swift, Objective-C) and Android (Kotlin, Java) **native modules**.
- Optimized data fetching with React Query (**80%** faster); built real-time **WebSocket** upload tracking (**30%** fewer support tickets) and an Instagram Stories-style feature (**50%** higher engagement); maintained **100% crash-free sessions** (Jest, React Testing Library, Sentry).

Software Developer

Aug 2023 - Nov 2023

MPS Info Services - Kolkata, India

- Delivered **8 mobile and web applications** for tax and wedding management platforms (React Native, React.js).
- Set up **Linux production servers** from scratch — deployed React frontends and **Laravel (PHP) backends** with Nginx, SSL, process management, and SMTP transactional email.
- Connected **3 Indian payment gateways** (Razorpay, PayU, PhonePe) with secure checkout, webhooks, and refunds; cut API latency **50%** via caching and load times **80%** via pre-fetching; built multi-role dashboards with role-based access control.

Devops Engineer

Jan 2023 - Jun 2023

Amazon India - Bengaluru, India

- Automated deployment pipelines for internal engineering tools, boosting CI efficiency **10x** and cutting build time from 12 to under **6 minutes** via parallelized jobs — earned a **full-time return offer**.

PROJECTS

Grovely: Puzzle your day – Cross-Platform Puzzle Game (Solo Indie)

[App Store](#) | [Google Play](#)

React Native, Expo, React Native Skia, InstantDB, SQLite, Jest, Claude Code

- Designed, built, and shipped a 4-game, 174-level puzzle app (Jigsaw, Sudoku, Sliding Tile, Memory Match) to the **App Store** and **Google Play** solo; on-device Sudoku generator with unique-solution guarantee, daily challenges, streaks, and XP progression.
- 60 fps puzzle animations with **React Native Skia**; **offline-first** SQLite storage with real-time cross-device cloud sync and auth via **InstantDB**.

LoomBox: Save Anything – Native iOS / iPadOS / macOS App (Solo Indie)

[App Store](#) | loombox.in

Swift, SwiftUI, SwiftData, Swift Concurrency, Share Extension, Live Activities, iCloud Sync, StoreKit

- Shipped a privacy-first “save anything” inbox: share links, reels, PDFs, screenshots, and locations from any app via a **Share Extension**; auto-categorised, searchable, zero onboarding, **on-device-only** storage (no account, no server, no tracking).
- Built with **SwiftUI + SwiftData** and zero third-party dependencies; background media downloads with **Live Activities** (WidgetKit) progress, **iCloud sync**, and a **StoreKit 2** Pro subscription.

EDUCATION

JIS College of Engineering – CGPA: 8.63/10 (First Class with Distinction)

2019 - 2023

Bachelor of Technology (B.Tech), Information Technology

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Swift, Kotlin, Objective-C, Java, PHP, React Native, React.js, Next.js, Node.js, Express.js, Laravel, SwiftUI, HTML5, CSS3, Tailwind CSS

Mobile & Native: React Native New Architecture (Fabric, TurboModules), Expo, EAS Build, iOS/Android Native Modules, SwiftData, React Navigation, Reanimated, React Native Skia, Tap to Pay, OTA Updates, Push Notifications, Deep Linking

State, Data & Backend: Redux Toolkit, React Query (TanStack Query), Zustand, Context API, REST APIs, GraphQL, WebSocket, MMKV, AsyncStorage, SQLite, InstantDB, Firebase, Supabase, MySQL, OAuth 2.0, Server-Driven UI, Stripe, Razorpay, PayU, PhonePe

Testing & DevOps: Jest, React Testing Library, Detox, Sentry, Accessibility (a11y), i18n, Git, GitHub Actions, CI/CD, Fastlane, Linux, Nginx, Xcode, Android Studio, AI-Assisted Engineering (Claude Code, Cursor)

Core Competencies: Frontend Development, Mobile App Development, Cross-Platform Development, Performance Optimization, Code Review, Mentoring, Agile/Scrum
